## OUR COMPANY

Enmax Group, headquartered in Shandong, China, is a leading manufacturer and supplier of high-performance construction machinery. ENMAX factories are strategically located in the heart of China's construction equipment industry. As a diversified group company, Enmax operates several specialized production lines, including truck-mounted cranes, spider cranes, AWP trucks, mobile truck cranes, and knuckle boom cranes.

With an annual R&D investment exceeding USD 1 million, Enmax continually develops and refines advanced machinery solutions to meet global demands. Our products are widely recognized in international markets — particularly our mobile cranes, which are highly popular across “Belt and Road” countries. Meanwhile, our compact spider cranes earned a strong reputation in Europe for their durability, reliability, and outstanding performance.

Backed by a skilled sales team of over 20 professionals, Enmax Group achieves an annual turnover of approximately USD 30 million. We are dedicated to delivering dependable, one-stop machinery procurement solutions that enhance operational efficiency and contribute to infrastructure development worldwide. At Enmax Group, we take pride in being a trusted global partner — building strength, lifting progress, and shaping a better future together.

# TRUCK MOUNTED CRANE

Our truck-mounted cranes are engineered to deliver exceptional performance across a wide range of industries, offering lifting capacities from **\*\*3.2 ton to 16 tons\*\*** to meet both light and heavy-duty lifting requirements. Combining **\*\*mobility, durability, and precision\*\***, these cranes are designed to excel in demanding environments, ensuring seamless operations and long-term reliability. Whether you're working on a construction site, managing logistics in a warehouse, or handling industrial tasks, our cranes provide the versatility and strength needed to tackle diverse challenges.

Built for **\*\*efficiency\*\***, our cranes feature powerful engines and optimized hydraulic systems that deliver high performance while minimizing fuel consumption, reducing operational costs and environmental impact. Rigorous testing and quality control processes guarantee **\*\*reliability\*\***, ensuring consistent performance even under the most demanding workloads.

From lifting heavy materials on construction sites to loading and unloading goods in logistics hubs, our truck-mounted cranes are versatile tools that enhance productivity across industries. Their **\*\*robust design\*\*** and adaptability make them indispensable for tasks ranging from small-scale operations to large industrial projects. With a focus on **\*\*efficiency, reliability, and versatility\*\***, our cranes are the ideal solution for businesses seeking powerful, portable, and dependable lifting equipment.

## MODEL NUMBER

# SPIDER CRANE

Our company is a leading manufacturer of premium spider lifts, offering a comprehensive range of models from 1 ton to 14 tons, tailored to meet the diverse and demanding needs of our global clientele. Renowned for their exceptional reliability, versatility, and cutting-edge engineering, our spider lifts have earned widespread recognition and trust across the European and North American markets. Designed to deliver superior performance in a variety of challenging environments, our lifts are equipped with advanced features such as enhanced stability, precise control, and eco-friendly operation, ensuring maximum safety and efficiency on the job site.

With a steadfast commitment to innovation, quality, and customer satisfaction, we continuously strive to push the boundaries of aerial work platform technology. Our spider lifts are ideal for a wide range of applications, including construction, maintenance, forestry, and event staging, providing our customers with the tools they need to achieve their goals with confidence and ease. Backed by a dedicated team of experts and a robust support network, we are proud to deliver solutions that not only meet but exceed industry standards, solidifying our reputation as a trusted partner in the access equipment industry.

# AERIAL WORK PLATFORM

ENMAX aerial work platform - conquer heights and achieve excellence

ENMAX is committed to providing customers with safe, reliable, efficient and convenient aerial work solutions. Our aerial work platform series covers working heights from 20 meters to 60 meters, meeting your diverse aerial work needs.

Choose ENMAX aerial work platform, you will get:

**Excellent performance:** Powerful power system, stable lifting performance, ensure that you can complete the work efficiently under various working conditions.

**Comprehensive safety guarantee:** Multiple safety protection devices, including anti-fall system, overload protection, emergency descent, etc., provide operators with all-round safety protection.

**Flexible operation experience:** Humanized control system, flexible steering and mobility, allowing you to easily cope with complex working environments.

# 3 IN 1 AWP TRUCK

ENMAX 3-in-1 Aerial Work Platform (AWP) Truck is a unique innovation that combines three powerful functions in one vehicle — aerial work platform, crane, and truck. Designed with versatility and efficiency in mind, it allows operators to lift, transport, and perform elevated work with ease and safety. This multifunctional solution maximizes productivity while minimizing equipment investment and operating costs.

Driven by the spirit of continuous innovation, ENMAX is committed to providing intelligent and reliable lifting solutions that adapt to the evolving needs of global customers. Every ENMAX product reflects our dedication to quality, safety, and precision engineering. The 3-in-1 AWP Truck embodies our belief in creating equipment that is not only Built to Last, Designed to Lift, but also engineered to empower our clients with greater flexibility and confidence in every project.

# INSULATED AWP TRUCK

ENMAX Insulated AWP Trucks are designed for safe, efficient high-voltage operations, offering Straight Boom and Hybrid Boom configurations. Built with world-leading insulated materials, they provide high voltage resistance and exceptional insulation performance.

The fully insulated work buckets rotate freely and feature vertical lifting, ensuring flexible, precise positioning. Safety is prioritized with interlock systems, hydraulic locks, emergency stop, and outriggers with ground protection, protecting operators and ground personnel during live-line work. An additional small jib crane facilitates lifting tools and auxiliary equipment, enhancing operational efficiency.

Reliable, durable, and easy to operate, ENMAX Insulated AWP Trucks suit complex electrical, utility, and industrial projects, delivering maximum performance and complete safety. With cutting-edge technology and professional engineering, ENMAX provides innovative and dependable insulated aerial work solutions for global customers.

# MOBILE TRUCK CRANE

Our company is a leading manufacturer and supplier of premium mobile truck cranes, offering a comprehensive range of models with lifting capacities from 5 to 25 tons. Engineered for exceptional performance and adaptability, our cranes are designed to meet the demanding requirements of various industries, including construction, oil and gas, logistics, and infrastructure development.

Our mobile truck cranes combine robust construction with advanced hydraulic systems, ensuring smooth operation, precise load handling, and maximum safety. With features such as compact designs, excellent maneuverability, and easy transportation, our cranes are ideal for both urban job sites and remote locations.

We pride ourselves on delivering innovative, reliable, and cost-effective lifting solutions tailored to the unique needs of our clients. Backed by a team of experienced professionals and a commitment to quality, we provide comprehensive support, from product selection and customization to after-sales service and maintenance.

At the core of our mission is a dedication to enhancing operational efficiency and safety for our customers. Whether you're tackling heavy lifting projects or handling delicate operations, our mobile truck cranes are built to deliver unmatched performance and durability. Partner with us to elevate your lifting capabilities and achieve your project goals with confidence.

## MODEL NUMBER

# KNUCKLE CRANE

Shandong enmax Construction Machinery Co., Ltd. is a technology-based company that specializes in the research, manufacturing and sales of truck-mounted cranes. The company possesses over 300 sets of advanced production equipment and has the capacity to produce approximately 3,000 sets of various lifting equipment and lifting devices annually. The company boasts strong technical capabilities, a well-established quality management system, advanced production techniques, and stable product quality.

The company can customize different tonnage and arm type lifting and lifting equipment machinery according to user requirements. It has successfully developed the third-generation straight-arm models ranging from 3.2 tons to 20 tons, and folding-arm models ranging from 3.2 tons to 300 tons, as well as the full series of truck-mounted cranes for transportation, accident clearance vehicles, and high-end customized products such as high-speed railway line maintenance platforms, highway greening maintenance equipment, tunnel construction equipment, etc. It can also customize 5-20 ton flying arms according to customer needs. The company's products are sold in over 20 provinces and cities across the country and have been exported to Central Asia, Southeast Asia, Africa, South America and other regions. The after-sales service system covers the entire world and the service is prompt!
